# MACHINE INTELLIGENCE, VOLS 1, 2, 3, 4, 5

The contents of Machine Intelligence, Volumes 1 to 5, are detailed in the following pages.

# MACHINE INTELLIGENCE 1 (1967) CONTENTS

PREFACE v

INTRODUCTION ix

ABSTRACT FOUNDATIONS

1 Linear graphs and trees. H.I.Scoins 3
2 Mathematical proofs about computer programs. D.C.Cooper 17

THEOREM PROVING

3 Beth-tree methods in automatic theorem-proving. R.J.Popplestone 31
4 The resolution principle in theorem-proving. D.Luckham 47

MACHINE LEARNING AND HEURISTIC PROGRAMMING

5 Tree-searching methods with an application to a network design problem. R.M.Burstall 65
6 Experiments with a learning component in a Go-Moku playing program. E.W.Elcock and A.M.Murray 87
7 An approach to automatic problem-solving. J.Doran 105
8 Complete solution of the 'Eight-Puzzle'. P.D.A.Schofield 125
9 Strategy-building with the Graph Traverser. D.Michie 135

COGNITIVE PROCESSES: METHODS AND MODELS

10 Networks as models of word storage. G.R.Kiss 155
11 Will seeing machines have illusions? R.L.Gregory 169

PATTERN RECOGNITION

12 Perception, picture processing and computers. Dr M.B.Clowes 181
13 Automatic speech recognition: a problem for machine intelligence. D.R.Hill 199

PROBLEM-ORIENTED LANGUAGES

14 Simply partitioned data structures: the compiler-compiler re-examined. R.A.Brooker and J.S.Rohl 229
15 The third-order compiler: a context for free man-machine communication. R.B.E.Napper 241
16 Principles for implementing useful subsets of advanced programming languages. G.F.Coulouris 257
17 Interrogation languages. J.M.Foster 267

AUTHOR INDEX 278

# MACHINE INTELLIGENCE 2 (1968)
# CONTENTS

PREFACE v

INTRODUCTION ix

ABSTRACT FOUNDATIONS

1 Semantics of assignment. R.M.BURSTALL 3
2 Some transformations and standard forms of graphs, with applications to computer programs. D.C.COOPER 21
3 Data representation – the key to conceptualisation. D.B.VIGOR 33

MECHANISED MATHEMATICS

4 An approach to analytic integration using ordered algebraic expressions. L.I.HODGSON 47
5 Some theorem-proving strategies based on the resolution principle. J.L.DARLINGTON 57

MACHINE LEARNING AND HEURISTIC PROGRAMMING

6 Automatic description and recognition of board patterns in Go-Moku. A.M.MURRAY and E.W.ELCOCK 75
7 A five-year plan for automatic chess. I.J.GOOD 89
8 New developments of the Graph Traverser. J.DORAN 119
9 BOXES: an experiment in adaptive control. D.MICHIE and R.A. CHAMBERS 137
10 A regression analysis program incorporating heuristic term selection. J.S.COLLINS 153

COGNITIVE PROCESSES: METHODS AND MODELS

11 A limited dictionary for syntactic analysis. P.BRATLEY and D.J.DAKIN 173

PROBLEM-ORIENTED LANGUAGES

12 POP-1: an on-line language. R.J.POPPLESTONE 185
13 Self-improvement in query languages. J.M.FOSTER 195
14 POP-2 reference manual. R.M.BURSTALL and R.J.POPPLESTONE 205

INDEX 250

# MACHINE INTELLIGENCE 3 (1968) CONTENTS

INTRODUCTION ix

MATHEMATICAL FOUNDATIONS

1 The morphology of prex – an essay in meta-algorithmics. J. LASKI 3
2 Program schemata. M. S. PATERSON 19
3 Language definition and compiler validation. J. J. FLORENTIN 33
4 Placing trees in lexicographic order. H. I. SCOINS 43

THEOREM PROVING

5 A new look at mathematics and its mechanization. B. MELTZER 63
6 Some notes on resolution strategies. B. MELTZER 71
7 The generalized resolution principle. J. A. ROBINSON 77
8 Some tree-paring strategies for theorem proving. D. LUCKHAM 95
9 Automatic theorem proving with equality substitutions and mathematical induction. J. L. DARLINGTON 113

MACHINE LEARNING AND HEURISTIC PROGRAMMING

10 On representations of problems of reasoning about actions. S. AMAREL 131
11 Descriptions. E. W. ELCOCK 173
12 Kalah on Atlas. A. G. BELL 181
13 Experiments with a pleasure-seeking automaton. J. E. DORAN 195
14 Collective behaviour and control problems. V. I. VARSHAVSKY 217

MAN–MACHINE INTERACTION

15 A comparison of heuristic, interactive, and unaided methods of solving a shortest-route problem. D. MICHIE, J. G. FLEMING and J. V. OLDFIELD 245
16 Interactive programming at Carnegie Tech. A. H. BOND 257
17 Maintenance of large computer systems – the engineer's assistant. M. H. J. BAYLIS 269

COGNITIVE PROCESSES: METHODS AND MODELS

18 The syntactic analysis of English by machine. J. P. THORNE, P. BRATLEY and H. DEWAR 281
19 The adaptive memorization of sequences. H. C. LONGUET-HIGGINS and A. ORTONY 311

PATTERN RECOGNITION

20 An application of Graph Theory in pattern recognition. C. J. HILDITCH 325

## PROBLEM-ORIENTED LANGUAGES

21 Some semantics for data structures. D. PARK 351
22 Writing search algorithms in functional form. R. M. BURSTALL 373
23 Assertions: programs written without specifying unnecessary order. J. M. FOSTER 387
24 The design philosophy of POP-2. R. J. POPPLESTONE 393

INDEX 403

# MACHINE INTELLIGENCE 4 (1969) CONTENTS

## MATHEMATICAL FOUNDATIONS

1 Program scheme equivalences and second-order logic. D.C.Cooper 3
2 Programs and their proofs: an algebraic approach. R.M.Burstall and P.J.Landin 17
3 Towards the unique decomposition of graphs. C.R.Snow and H.I.Scoins 45

## THEOREM PROVING

4 Advances and problems in mechanical proof procedures. D.Prawitz 59
5 Theorem-provers combining model elimination and resolution. D.W.Loveland 73
6 Semantic trees in automatic theorem-proving. R. Kowalski and P.J.Hayes 87
7 A machine-oriented logic incorporating the equality relation. E.E.Sibert 103
8 Paramodulation and theorem-proving in first-order theories with equality. G.Robinson and L.Wos 135
9 Mechanizing higher-order logic. J.A.Robinson 151

## DEDUCTIVE INFORMATION RETRIEVAL

10 Theorem proving and information retrieval. J.L.Darlington 173
11 Theorem-proving by resolution as a basis for question-answering systems. C.Cordell Green 183

## MACHINE LEARNING AND HEURISTIC PROGRAMMING

12 Heuristic dendral: a program for generating explanatory hypotheses in organic chemistry. B.Buchanan, G.Sutherland and E.A.Feigenbaum 209
13 A chess-playing program. J.J.Scott 255
14 Analysis of the machine chess game. I.J.Good 267
15 PROSE – Parsing Recogniser Outputting Sentences in English. D.B.Vigor, D.Urquhart and A.Wilkinson 271
16 The organization of interaction in collectives of automata. V.I.Varshavsky 285

## COGNITIVE PROCESSES: METHODS AND MODELS

17 Steps towards a model of word selection. G.R.Kiss 315
18 The game of hare and hounds and the statistical study of literary vocabulary. S.H.Storey and M.A.Maybrey 337
19 The holophone – recent developments. D.J.Willshaw and H.C.Longuet-Higgins 349

## PATTERN RECOGNITION

20 Pictorial relationships – a syntactic approach. M.B.CLOWES 361
21 On the construction of an efficient feature space for optical character recognition. A.W.M.COOMBS 385
22 Linear skeletons from square cupboards. C.J.HILDITCH 403

## PROBLEM-ORIENTED LANGUAGES

23 Absys 1: an incremental compiler for assertions; an introduction. J.M.FOSTER and E.W.ELCOCK 423

## PRINCIPLES FOR DESIGNING INTELLIGENT ROBOTS

24 Planning and generalisation in an automaton/environment system. J.E.DORAN 433
25 Freddy in toyland. R.J.POPPLESTONE 455
26 Some philosophical problems from the standpoint of artificial intelligence. J.MCCARTHY and P.J.HAYES 463

# MACHINE INTELLIGENCE 5 (1970)
# CONTENTS

INTRODUCTION vii

PROLOGUE

Intelligent machinery. A.M.TURING [1912–1954] 3

MATHEMATICAL FOUNDATIONS

1 Properties of programs and partial funtion logic. Z.MANNA and J.MCCARTHY 27
2 Program schemes and recursive function theory. R.MILNER 39
3 Fixpoint induction and proofs of program properties. D.PARK 59
4 Formal description of program structure and semantics in first order logic. R.M.BURSTALL 79
5 A program machine symmetric automata theory. P.J.LANDIN 99

MECHANIZED REASONING

6 A note on mechanizing higher order logic. J.A.ROBINSON 121
7 Transformational systems and the algebraic structure of atomic formulas. J.C.REYNOLDS 135
8 A note on inductive generalization. G.D.PLOTKIN 153
9 Power amplification for automatic theorem-provers. B.MELTZER 165
10 Search strategies for theorem-proving. R.KOWALSKI 181
11 An experiment in automatic induction. R.J.POPPLESTONE 203

MACHINE LEARNING AND HEURISTIC SEARCH

12 First results on the effect of error in heuristic search. I.POHL 219
13 A set-oriented property-structure representation for binary relations, SPB. E.J.SANDEWALL 237
14 Rediscovering some problems of artificial intelligence in the context of organic chemistry. B.G.BUCHANAN, G.L.SUTHERLAND and E.A.FEIGENBAUM 253
15 Memo functions, the Graph Traverser and a simple control situation. D.L.MARSH 281
16 Experiments with the adaptive Graph Traverser. D.MICHIE and R.ROSS 301

MAN–MACHINE INTERACTION

17 An interactive theorem-proving program. J.R.ALLEN and D.LUCKHAM 321
18 A symbol manipulation system. F.V.MCBRIDE, D.J.T.MORRISON and R.M.PENGELLY 337

## COGNITIVE PROCESSES: METHODS AND MODELS

19 Associative memory models.
D. WILLSHAW and H. C. LONGUET-HIGGINS 351
20 Hierarchical decomposition of complexity. M. H. VAN EMDEN 361

## PATTERN RECOGNITION

21 A grammar for the topological analysis of plane figures. P. BUNEMAN 383
22 Shape analysis by use of Walsh functions. N. H. SEARLE 395
23 Conic sections in automatic chromosome analysis. K. A. PATON 411
24 Centromere finding: some shape descriptors for small chromosome outlines. D. RUTOVITZ 435
25 ESOTERIC II – an approach to practical voice control: progress report 69.
D. R. HILL and E. B. WACKER 463
26 On imitative systems theory and pattern recognition. P. A. V. HALL 495

## PRINCIPLES FOR DESIGNING INTELLIGENT ROBOTS

27 Planning and robots. J. E. DORAN 519
28 Robotologic. P. J. HAYES 533
29 Design of low-cost equipment for cognitive robot research.
H. G. BARROW and S. H. SALTER 555

## APPENDIX

Bibliography on proving the correctness of computer programs.
R. L. LONDON 569

## INDEX
