INTRODUCTION	vii
PERSPECTIVE	
1 The social implications of intelligent machines. R.L.GREGORY	3
PROGRAM PROOF AND MANIPULATION	
2 Formalization of properties of parallel programs. E. ASHCROFT and Z. MANNA	17
3 Programs for mechanical program verification. D.C.COOPER	43
MECHANIZED REASONING	
4 Computational logic: the unification computation. J.A.ROBINSON	63
5 A note on the relation between resolution and Maslov's inverse method. D.KUEHNER	73
6 Proof-search strategies for methods of the resolution type. S.JU.MASLOV	77
7 A partial mechanization of second-order logic. J.L.DARLINGTON	91
8 A further note on inductive generalization. G.D.PLOTKIN	101
HEURISTIC PARADIGMS AND CASE STUDIES	
9 Bi-directional search. I.POHL	127
10 Optimal data compression. M.H.VAN EMDEN	141
11 Computer chess—A case study on the CDC 6600. D.N.L.LEVY	151
12 On generality and problem solving: A case study using the DENDRAL program. E.A.FEIGENBAUM, B.G.BUCHANAN and J.LEDERBERG	165
13 The genetics counselor. G.HUNN and J.LEDERBERG	191
COGNITIVE AND LINGUISTIC MODELS	
14 Some recent models of the brain. J.E.DORAN	207
15 On interpreting Bach. H.C.LONGUET-HIGGINS and M.J.STEEDMAN	221
16 Question-answering in English. S.ISARD and H.C.LONGUET-HIGGINS	243
17 Representing natural language information in predicate calculus. E.SANDEWALL	255
APPROACHES FOR PICTURE ANALYSIS	
18 Isotonic grammars, parallel grammars and picture grammars. A.ROSENFELD	281
19 Impossible objects as nonsense sentences. D.A.HUFFMAN	295
20 Analysis of curved line drawings using context and global information. A.GUZMAN	325
21 Relational descriptions in picture processing. H.G.BARROW and R.J.POPPLESTONE	377
22 Edge detection in pictures by computer using planning. M.D.KELLY	397

**CONTENTS**

**PROBLEM-SOLVING LANGUAGES AND SYSTEMS**

23 Representations and modeling in problems of program formation.  
S. AMAREL 411

24 ABSET: A programming language based on sets; motivation and  
examples.  
E. W. ELCOCK, J. M. FOSTER, P. M. D. GRAY, J. J. MCGREGOR and  
A. M. MURRAY 467

**PRINCIPLES FOR DESIGNING INTELLIGENT ROBOTS**

25 A logic of actions. P. J. HAYES 495

**INDEX** 521

# INTRODUCTION

---

In the introduction to the previous volume, it was mentioned that each future Workshop would include a specially invited address on possible social applications and implications of intelligent machines. The Sixth Machine Intelligence Workshop, the proceedings of which are recorded here, marks the first of this new series. Professor R.L.Gregory presented, in terms both whimsical and profound, his conception of 'brain fictions' and their relation to the interface between the worlds of the psychologist and of the engineer. Gregory's message is directed towards whoever is willing himself to question the origins and consequences of new technologies and the transformations of Man's self-picture which they bring in their train.

The speed with which the new arts of machine intelligence may be expected to act upon this self-picture not only continues to be evidenced by the content of the Workshops, but has also received recent recognition in the foundation of a new international journal, *Artificial Intelligence*, following suggestions made at the final meeting of an earlier Workshop. The journal is directed by a distinguished and widely representative editorial board, and published by American Elsevier. All who believe that the new discipline has something of importance to offer to science and scholarship, and to mankind at large, will wish the new venture success.

A special word of appreciation for the Science Research Council's support of the Workshop series is called for. SRC again met the financial cost of this Workshop. It will also not have escaped the attention of those who read 'Acknowledgements' sections that the great bulk of work conducted in the United Kingdom has been sponsored by SRC; the launching of the new journal thus also arises indirectly from its support.

Once again the University of Edinburgh provided the venue, and defrayed the cost of the Workshop Lunch. We were also fortunate that Mrs J.E.Hayes and Dr Helen Muirhead were able once more to devote themselves respectively to the organization of the Workshop and the editing of the volume with the special blend of efficiency and good humour on which old Workshop hands have come to rely.
